

On-site Boiler Refuelling 24/7

Boilers & Furnaces in industries burn Diesel to generate heat, in millions of litres, every year.

We understand the importance of a reliable delivery for a Boiler site. Unproductive refuelling time by conventional means can increase your cost significantly. We understand the boiler industry and provide consistent reliable service, ensuring our customer's equipment are always fuelled.

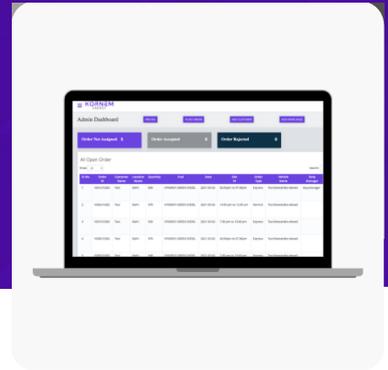

Benefits

Reduce the need to store fuel onsite

Kornem ensures 24/7 delivery of fuel to all its customers, businesses specially in construction, benefit heavily from 24/7 services. Additionally, our customers don't store fuel in barrels for future use cause they can schedule the delivery of fuel anytime and we offer direct refuelling into the their machineries.

Byworth
MILNER

Eliminate fuel theft

With Kornem's on-site refuelling, our customers can completely eliminate fuel theft which happens during the fuel purchase at fuel stations or during the transport of fuel from fuel stations to boiler site

Eliminate idle time for refuelling

With Kornem's onsite direct to equipment refuelling, our customers reduce idle time for refuelling. Kornem ensures 24/7 delivery of fuel to all its customers, businesses specially in boilers, benefit heavily from 24/7 services.

Monitor fuel consumption

With Kornem on-site refuelling & interactive dashboard, our customers can monitor their fuel consumptions for each machinery and if they require refuelling in multiple locations, they can also monitor their fuel consumption for each locations as well. This way, our customer can also budget for fuel for each location appropriately.

With Kornem Energy as your energy partner, fueling your business is one less thing to worry about
